FRP ROOFING SHEET

FRP (Fiberglass Reinforced Plastic) roofing sheets are a type of roofing material made from a combination of fiberglass and plastic resin. These sheets are known for their durability, strength, and versatility, making them a popular choice for various roofing applications.

Type of FRP Roofing Sheet

1) Corrugated FRP Roofing Sheets:

- Corrugated FRP sheets have a wavy or ribbed pattern that provides added strength and stiffness to the roofing material.
- Corrugated FRP roofing sheets are often used for carports, agricultural buildings, and industrial structures.

2) FLAT FRP ROOFING SHEET

- Flat FRP sheets have a smooth surface without any corrugations.
- They are often used in applications where a flat, aesthetically pleasing appearance is desired, such as residential roofing and architectural designs.
